AMENDMENT UNDER 37 C.F.R. § 1.111 Attorney Docket No.: Q95618

Application No.: 10/584,284

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

A speed control method of an elevator-purpose comprising previously calculating an

elevating distance in such a case that the elevator passenger car is decelerated from a reference

frequency up to a leveling frequency in a constant deceleration speed, when the induction motor

is stopped. The elevator passenger car is driven in a constant speed at an intermediate frequency

so that the previously calculated distance becomes equal to an elevating distance when the

elevator passenger car is decelerated at the constant deceleration speed from an arbitrary

frequency up to the leveling frequency so as to adjust the elevating distance. The elevator

passenger car is automatically decelerated at the constant deceleration speed up to the leveling

frequency.
